Bee My Honey Apiary is located in Stillwater
New Jersey.

Honey bees have many benefits to both humans and the environment they live in. They pollinate fruits, vegetables, nuts, flowers, berries and produce beeswax, pollen, and of course honey.

Local honey contains small amounts of pollen from seasonal plants and can help you build up a resistance to seasonal allergies.

Our honey is wildflower honey, raw, pure and delicious. We hope you enjoy all the benefits that honey can bring you.

To your good health
Jeff, Michele and our girls
